MATTHIEU GLAISNER

Product Manager

+49 176 80042448
matthieu.glaisner@live.fr
Munich, Germany

Product Manager with a background in automotive engineering, ergonomics, and digital product development. I combine hands-on technical expertise with customer discovery, roadmap planning, and cross-functional delivery to bring products from concept to launch. Having worked with OEMs and teams across Europe, Asia, and North America, I am experienced in translating customer needs into product strategy, requirements, and measurable outcomes. My recent focus has been on AI-driven products and rapid prototyping, leveraging modern development tools to validate ideas quickly and accelerate product decisions.

SKILLS

Product management

- Customer discovery
- Roadmap planning & prioritization
- Backlog management
- PRDs
- Cross-functional collaboration
- Executive reporting & risk management
- Rapid prototyping
- Agentic AI-assisted development

Human factors

- RAMSIS
- Anthropometric analysis
- Interior concept development
- Digital and physical mock-ups

Mechanical engineering

- 3D CAD modeling
- Advanced surfacing (Catia v5)
- Technical drawings
- Composite part design
- Prototyping & assembly
- PLM
- Design injection processes
- Computing / Simulation

Tools & Technologies

- Cursor AI
- Gitlab / Github
- React, Typescript, SQL
- Atlassian Suite (Jira, JPD, Confluence)
- Office 365
- Catia v5

LANGUAGES

French C2 - Native
English B2 - Full Professional
German C1 - Full Professional

PROFESSIONAL EXPERIENCES

Product Manager

01/2026 - Today

HUMANETICS GROUP, Munich, Germany

- **Lead customer discovery** with international OEMs (China, Japan, Germany, USA) in English and German to **shape product vision, roadmaps, and PRDs for AI/ML and digital initiatives.**
- **Prioritize product backlogs and run Agile/SCRUM** delivery in Jira and Confluence, aligning engineering, sales, and management on milestones and business value.
- **Contribute to business plans and executive reporting** (risks, dependencies, strategic insights) for innovation and digital transformation programs.
- **Build early prototypes with AI dev tools** (Cursor, VS Code, GitLab) to validate concepts and shorten iteration before full engineering commitment.

Application Engineer – Automotive

07/2023 – 01/2026

HUMANETICS GROUP, Munich, Germany

- **Ran RAMSIS ergonomics studies** (reach, visibility, comfort, accessibility) to support interior concept and prototyping for ~5 major OEM programs per year.
- **Built full-scale digital mock-ups in CATIA V5** (GSD, Part Design, Assembly Design) from designer surfaces, packaging, and engineering data.
- **Supported BMW Neue Klasse interior ergonomics and anthropometric analyses** using Humanetics data and realistic user scenarios.
- **Coordinated with OEM** engineering and prototype manufacturing in German; owned planning, reporting, and delivery against OEM PLM/CAD standards and deadlines.

Technical Designer

04/2021 – 07/2023

ROTAREX, Lintgen, Luxembourg

- **Designed and updated CATIA V5 3D models** and manufacturing drawings for industrial valves (catalogue and custom customer solutions).
- **Ensured drawing accuracy, quality, and production readiness** in collaboration with senior engineers and shop-floor teams.
- **Maintained PLM records and technical documentation** consistency across the product lifecycle.

Technical Designer

01/2018 – 04/2021

HUTCHINSON, Montargis, France

- **Designed thermal-management solutions** in Creo with thermal engineers, meeting thermal, mechanical, and manufacturing requirements.
- **Built automotive sub-assemblies and concept demonstrators** from design through prototype assembly; contributed to patent work on thermal innovations.
- **Produced composite aircraft components** and detailed drawings from calculations, standards, and customer specifications.

EDUCATION

DUT Génie Mecanique et Productique

2017

IUT de Ville d'Avray, Ville d'Avray

Baccalauréat Scientifique, Mathématiques

2015

Lycée Jacques Monod, Clamart
